

VOCATIONAL REHABILITATION SELF-EMPLOYMENT GUIDE

With the help of business owners with disabilities, business experts, and several VR and Tribal VR program staff, we developed a website to assist people with disabilities in exploring and preparing for self-employment. Although the website was designed for consumers of VR services, it is appropriate for anyone thinking about starting their own business.

The website includes information and worksheets to help new business owners navigate business planning and start-up activities. It also includes print-only versions of all information and accessible worksheets that can be downloaded for future use.

Check out the guide at
